

Come Join CCI at ITMA ASIA 2018 in Shanghai this October!

CCI cordially invites you to visit the ITMA ASIA + CITME 2018 in Shanghai from 15 to 19 Oct, 2018. Our booth is located in exhibition **hall 3**, booth number of **C08**, with an eye-catching structure of back wall which makes the whole booth pop. We welcome all our old and new friends to stop by at any time to say hello and discuss your specific needs.

During the show, we will be showcasing **Expanded Dimension solution** that has been engineered to simplify the entire user experience for fabric production. Most of sampling solutions nowadays are designed for making fabric swatch in 500 mm width only, but it is not wide enough to be made into a piece of garment or bigger sized towel... CCI's expanded dimension solution is capable of creating wider width of 900 mm which is ideal for producing any sample of final products. Powered by computer-controlled technology, even non-technical person can operate the machine easily. At our booth, you can see how our solution works and increases business efficiency for your fabric sample and small quantity order. The solution includes:

- **Evergreen 900** - Automatic Sampling Loom

Evergreen adopts different independent drives which are computerized to allow more precise & simple control of position & speed. Its less space occupancy is ideal for use in any space-limited environment such as office, design studio, and R&D center.

■ **Mini Lutan 900** - Single-end Warping Machine

The 'Ring' warping method allows the length of the warp to be easily determined after specified rounds. It also eliminates the friction between yarn and machine parts during operation. The warp tension and beaming speed are adjustable according to types of material used.

■ **Taroko** - Multi-spindle Sizing Machine

Taroko comes with bobbin to bobbin sizing and modular design. Its speed and temperature can be set individually for each spindle with a touch-screen panel to ensure high stability. Besides, the drying chamber is specially designed to make it operate in uniform low tension without changing the nature of yarn.

This show is the perfect opportunity to know CCI's full range solutions. We welcome you to schedule a meeting with us to discuss your requirements. Just email us at info@ccitk.com, we will contact you shortly to confirm the meeting details. We look forward to seeing you at ITMA ASIA + CITME 2018!
