### Simplify weaving job for Sampling, R&D and Small Order

CCI is going to show you how easy it is to master your woven fabric weaving at **TITAS 2024** in Taipei, Taiwan. Whether you're making a sample, running R&D or short-run production, we can provide you the best solution to greatly increase your work efficiency. Our complete automated solutions include single-end sizing, single-end warping and weaving machines.

CCI is fully committed to sampling solutions for varied weaving application. We change the conventional way that people used to know. With innovative technology, we simplify and downsize the traditional production equipment. Unlike a large group of yarn bobbin required on traditional equipment, CCI's solution has a very simple design which requires as minimum as "**1 bobbin**" to complete most weaving process. All our machines adopt computer-controlled technology and user-friendly interface design to greatly improve production efficiency and further reduce costs.

Only need "**1 bobbin**", you can easily finish new product R&D and design, also can make sample and small quantity production faster. Our solutions can fit a variety of applications like clothing, home textiles, medical, protective, high-tech and Industrial applications. The best part is, you can make fabrics of the same quality as on production line at lower cost!

The Sampling Loom, **Evergreen II** will be exhibiting during TITAS 2024 to show you how to create a piece of fabric less than '**1 day**'. Don't miss this event and visit us at **booth no. L2402**, Taipei Nangang Exhibition Center, Hall 1, from Oct 15 to 17.
